Subject Index to Volume 43[1]

Acetylation pharmacogenetics
Acetylation pharmacogenetics: experimental models for human toxicity, 2332
Acetylation polymorphism
Pharmacoanthropology: outline, problems, and the nature of case histories, 2314
Acetylcholine
Cardiovascular regulation by brain acetylcholine, 17
Hydrolysis, synthesis, and release of acetylcholine in the isolated heart, 2603
Acetylcholine-induced depolarization
Acetylcholine-induced potential fluctuations and underlying currents in rat adrenal chromaffin cells, 2364
Actin
A mutation in actin associated with neoplastic transformation, 2275
Adenohypophyseal cells
Electrical activity in adenohypophyseal cells and effects of hypophyseotropic substances, 2373
Adenylate cyclase
Pharmacological properties and localization of dopamine-sensitive adenylate cyclase in the carp retina, 2719
Adrenal chromaffin cell
Acetylcholine-induced potential fluctuations and underlying currents in rat adrenal chromaffin cells, 2364
Adrenergic blocking agents
Pharmacologic tools for assessment of adrenergic nerve activity in human hypertension, 67
Adrenergic receptors
Adrenergic control of coronary arteries, 2857
α-Adrenergic tone
α-Adrenergic tone in the coronary circulation of the conscious dog, 2867
Adrenergic transmitter release
Presynaptic α-receptor control of adrenergic transmitter release in blood vessels, 1365
Adrenergic transmitters
Effects of the adrenergic transmitter on epicardial coronary arteries, 2862
α adrenoceptors
Interactions of agonists with peripheral α-adrenergic receptors, 2910
Peripheral α-adrenergic receptors, 2908
Renal α adrenoceptors, 2917
α_2 adrenoceptors
Evidence that noradrenergic transmitter release is regulated by presynaptic receptors, 1352
Adrenoreceptors
Peripheral presynaptic adrenoreceptor regulation of norepinephrine release in humans, 1379
Adverse drug reactions
In vitro assessment of pharmacogenetic susceptibility to toxic drug metabolites in humans, 2308
Agonist radioligands
Agonist radioligands for identifying functional neurotransmitter receptors, 2765
Allograft acceptance
Strategies promoting allograft acceptance: an overview, 261
Amino acids
History of parenteral nutrition in pediatrics with emphasis on amino acids, 1407
Role of protein degradation in the regulation of cellular protein content and amino acid pools, 1283
Aminoacyl-tRNA synthetases
Cell culture mutants as aminoacyl-tRNA synthetase complex probes, 2991
Recognition of tRNAs by aminoacyl-tRNA synthetases: *Escherichia coli* $tRNA^{Met}$ and *E. coli* methionyl-tRNA synthetase, 2977
Size polymorphism and the structure of aminoacyl-tRNA synthetases, 2987
γ-Aminobutyric acid
Central γ-aminobutyric acid involvement in blood pressure control, 32
γ-Aminobutyric acid receptors
Biochemical pharmacology of the γ-aminobutyric acid receptor/ionophore protein, 2773
Amphiphilic drugs
Role of age in amphiphilic drug-induced pulmonary morphological and metabolic responses, 2592
Anaerobic energy metabolism
Anaerobic energy metabolism of invertebrates, 220
Anaphylatoxin
Anaphylatoxin-mediated regulation of human and murine immune responses, 2543
Angiotensin-converting enzyme inhibitors
Research forum: angiotensin-converting enzyme inhibitors, 1313
Anorexia
Opioids, feeding, and anorexias, 2893
Anticonvulsant drugs
Evaluation of anticonvulsant drugs in genetic animal models of epilepsy, 276
Antiemetics
Behavioral and electrophysiological studies of peptide-induced emesis in dogs, 2952
Anti-idiotypic antibodies
Monoclonal and anti-idiotypic antibodies as probes for receptor structure and function, 2532
Anti-inflammatory agents, nonsteroidal and steroidal
Effect of topically applied steroidal and nonsteroidal anti-inflammatory agents on skin repair and regeneration, 2793
Antipyrine
A new polymorphism of hepatic drug oxidation in humans: family studies of antipyrine metabolites, 2342
Apical membranes
Ion transport processes in apical membranes of epithelia, 2473
Appetite
Neuropeptides and appetite: contribution of neuropharmacological modeling, 2903
Arachidonic acid
The role of arachidonic acid in vasogenic brain edema, 210
Area postrema
History and status of the area postrema, 2937
Neuronal connections of the area postrema, 2941
Arrhythmias
Localization of neurally mediated arrhythmogenic and coronary vasoconstrictor properties of digitalis, 2963
ATPase
Calmodulin-sensitive calcium-pumping ATPase of plasma membranes: isolation, reconstitution, and regulation, 3005
Autonomic nervous system
Autonomic degeneration and altered blood pressure control in humans, 62
Cardiac sympathetic-parasympathetic interactions, 2598
Autonomic regulation
Limitations of presynaptic theory: no support for feedback control of autonomic effectors, 1358

Basolateral membranes
Ion transport processes in basolateral membranes of epithelia, 2488
B cell activation
Role of surface immunoglobin in B lymphocyte activation, 2624
Benzodiazepine receptors
Benzodiazepine receptor heterogeneity: possible molecular basis and functional significance, 2767
Biophysical properties
Biophysics of domes formed by the renal cell line Madin-Darby canine kidney, 2217
Blood-brain barrier
The blood-brain barrier, 185
The structure and function of the blood-brain barrier, 186
Blood platelets
Blood platelet function, medicinal agents, and other chemical entities, 1382
Blood pressure
Nonadrenergic central control of blood pressure, 16
The development of vasopressin antagonists, 87
Body weight regulation
Area postrema: part of the autonomic circuitry of caloric homeostasis, 2966

Books received

6, 1280, 2206, 2350, 2472, 2564, 2854

[1] This index covers volume 43, with the exception of nos. 3, 4, 6, and 7, the abstracts issues, which carry permuted subject indexes. The boldface numbers, used in certain entries, refer to the issue number; the lightface numbers refer to page numbers.

Brain tumors
Modification of the blood-brain barrier in chemotherapy of malignant brain tumors, 214

Calcium
Role of calmodulin in neurotransmitter synthesis, 3011
Calcium utilization
Postsynaptic α adrenoceptors on vascular smooth muscle, 2923
Calmodulin
Calmodulin, 2994
Gap junction structure and cell-to-cell coupling regulation: Is there a calmodulin involvement, 2681
Cancer
Analysis of human monoclonal antibodies derived from lymphocytes of patients with cancer, 2465
Capillary exchange
Kinetics of capillary exchange, 147
Captopril
Effects of captopril and enalapril on sodium excretion and blood pressure in sodium-deficient dogs, 1336
Effects of captopril on the development of tolerance to guanethidine, 1342
Cardiac energetics
Energetics of ventricular contraction as traced in the pressure-volume diagram, 2411
Cardiac nerves
Cardiac sympathetic-parasympathetic interactions, 2598
Cardiomyopathy
Clinical use of pressure-dimension and stress-shortening relations in systole and diastole, 2414
Cardiovascular regulation
Participation of the area postrema in cardiovascular control in the dog, 2959
Vasopressin and cardiovascular regulation, 78
Catecholamines
Catecholamines and indoleamines in retina, 2697
Plasma catecholamine levels in normal subjects and in patients with secondary hypertension, 52
Plasma norepinephrine and epinephrine levels in essential hypertension, 57
Cationic amphiphilic drugs
Molecular studies of the induction of cellular phospholipidosis by cationic amphiphilic drugs, 2582
C3b receptor
Structure and function of the human C3b receptor, 2553
Cell growth
Control of cell growth by nutrients, 107
Modulation of cell growth by retinoids and their possible mechanisms of action, 134
Role of cholesterol metabolism in cell growth, 126
Cell-mediated cytotoxicity
Cell-mediated cytotoxicity, 266
Cell proliferation
Calmodulin: its potential role in cell proliferation and heavy metal toxicity, 2995
Cell-to-cell communication
Cell-to-cell communication, 2671
Cellular triggering
Complement and cellular triggering reactions, 2540
Cerebrospinal fluid
Deoxynucleoside and vitamin transport into the central nervous system, 196
Chemoattractant receptors
Regulatory mechanisms of a chemoattractant receptor on leukocytes, 2743
Chemotherapy
Modification of the blood-brain barrier in chemotherapy of malignant brain tumors, 214
Chicken embryo fibroblasts
Deprival of nicotinamide leads to enhanced glucose transport in chick embryo fibroblasts, 2265
Regulation of hexose transporters of chicken embryo fibroblasts during glucose starvation, 2262
Chloride secretion
The action of epinephrine on Madin-Darby canine kidney cells, 2225
Chlorphentermine
Pulmonary disposition and effects of drugs on pulmonary removal of endogenous substances, 2586
Cholecystokinin
Peptidergic control of food intake in food-producing animals, 2898
Cholesterol metabolism
Role of cholesterol metabolism in cell growth, 126
Cholinergic neurotransmitters
Effects of acetylcholine on the coronary artery, 2878
CI-906
Antihypertensive profile of the angiotensin-converting enzyme inhibitors CI-906 and CI-907, 1330
CI-906 and CI-907: new orally active non-sulfhydryl angiotensin-converting enzyme inhibitors, 1326
CI-907
Antihypertensive profile of the angiotensin-converting enzyme inhibitors CI-906 and CI-907, 1330
CI-906 and CI-907: new orally active non-sulfhydryl angiotensin-converting enzyme inhibitors, 1326
Circumventricular organ
The structure of the mammalian area postrema, 2944
Clonal expansion
Helper cell-independent clonal expansion of H-2D-restricted cytolytic T cells, 268
^{13}C NMR
^{13}C NMR studies of dynamics and synthetase interaction of [4-^{13}C]uracil-labeled *Escherichia coli* tRNAs, 2984
Collagen
Pharmacological inhibition of excessive collagen deposition in fibrotic diseases, 2815
Complement
Complement and cellular triggering reactions, 2540
Role of complement in the immune response, 2548
Congestive heart failure
Overview: the role of angiotensin-converting enzyme inhibitors in cardiovascular therapy, 1314
Coronary arteries
Adrenergic control of coronary arteries, 2857
Coronary tone
Why nerves to coronary vessels?, 2855
Coronary vasoconstriction
Localization of neurally mediated arrhythmogenic and coronary vasoconstrictor properties of digitalis, 2963
Cultured brain endothelial cells
Use of isolated brain capillaries and cultured endothelial cells to study the blood-brain barrier, 191
Cultured epithelia
Electrical properties of Madin-Darby canine kidney cells, 2230
Cytotoxic T lymphocytes
Cytotoxic T lymphocyte recognition of class I H-2 antigens after DNA-mediated gene transfer, 271

Differentiation
Differentiation of epithelial cells, 2207
Factors affecting the differentiation of epithelial transport and responsiveness to hormones, 2221
Diuretics
Acute antihypertensive synergism of angiotensin-converting enzyme inhibitors and diuretics, 1346
DNA duplexes
Dynamics of DNA duplexes containing internal G·T, G·A, A·C, and T·C pairs: hydrogen exchange at and adjacent to mismatch sites, 2663
DNA-mediated gene transfer
Cytotoxic T lymphocyte recognition of class I H-2 antigens after DNA-mediated gene transfer, 271
DNA synthesis
Hepatocyte DNA replication: effect of nutrients and intermediary metabolites, 131
Domestic animals
Domestic animals in the elucidation of zinc's role in nutrition, 2823
Dopamine
Modulation of [^{3}H]dopamine release from rabbit retina, 2714
Regulation of retinal dopamine biosynthesis and tyrosine hydroxylase activity by light, 2709
Dopamine receptors
Agonist interactions with dopamine receptors: focus on radioligand-binding studies, 2779
Drug accumulation
Consequences of pulmonary accumulation of drugs, 2572
Drug-induced pulmonary disease
Pulmonary disposition and effects of drugs on pulmonary removal of endogenous substances, 2586
Drug metabolism
Pharmacoanthropology: drug metabolism, 2326

Electrical activity
Electrical pacemaker mechanisms of pancreatic islet cells, 2368
Electrical coupling, cell
Gap junction structure and cell-to-cell coupling regulation: Is there a calmodulin involvement, 2681
Electrical properties
Electrical properties of Madin-Darby canine kidney cells, 2230
Electrophysiology
Electrophysiology of secretory cells, 2362
Electroshock
Regulatory effects of neurotransmitters on electroshock and pentylenetetrazol seizures, 2521

Employment opportunities

1: 17a; **2:** 13a; **4:** v; **5:** 11a; **8:** 17a; **9:** 15a; **10:** 13a; **11:** 17a; **12:** 15a; **13:** 19a; **14:** 17a; **15:** 21a

Enalapril
Effects of captopril and enalapril on sodium excretion and blood pressure in sodium-deficient dogs, 1336
Endogenous opioids
Opioids, feeding, and anorexias, 2893
End-systolic pressure-volume relationship
End-systolic pressure-volume relationship in retrospect and prospect, 2399
Factors affecting the end-systolic pressure-volume relationship, 2408
End-systolic relations
Applications and limitations of end-systolic measures of ventricular performance, 2418
Enzyme mechanisms
Use of ^{31}P and ^{13}C NMR to study enzyme mechanisms, 2640
Epicardial coronary arteries
Effects of the adrenergic transmitter on epicardial coronary arteries, 2862
Epilepsy
animal models
Evaluation of anticonvulsant drugs in genetic animal models of epilepsy, 276
Neurotransmitters and epilepsy: an overview, 2503
Neurotransmitters and epilepsy: distinguishing characteristics and unifying precepts, 2529
Epinephrine
Identification of epinephrine and phenylethanolamine *N*-methyltransferase activity in rat retina, 2725
Epithelial cell replication
Interdependent regulation of epithelial cell replication by nutrients, hormones, growth factors, and cell density, 116
Epithelial polarity
Analysis of epithelial cell surface polarity with monoclonal antibodies, 2208

Errata

2349, 2471
Eukaryotic promoter
A novel eukaryotic promoter element: the simian virus 40 72 base pair repeat, 226

F

Federation news

1, 141
Feeding behavior
Peptidergic control of food intake in food-producing animals, 2898
Flavonoids, food
Mutagenic food flavonoids, 2454
fMet-Leu-Phe
Mobilization and adaptation of human neutrophil chemoattractant fMet-Leu-Phe receptors, 2732
Food intake, neuropeptidergic regulation
Neuropeptidergic regulation of food intake, 2888
Functional unit
Modeling exchange in capillary beds, 148
Funding, extramural instrumentation
Extramural instrumentation funding by the National Institutes of Health, 2565

G

ap junctions
Molecular organization of gap junctions, 2672
The biosynthesis of gap junctions, 2678
Gastrointestinal vascular physiology
Regional vascular behavior in the gastrointestinal wall, 7
Genetic epilepsy
Neurotransmitter abnormalities in genetically epileptic rodents, 2505
Glucose transport
Insulin-induced translocation of intracellular glucose transporters in the isolated rat adipose cell, 2251
One transporter per vesicle: determination of the basis of the insulin effect on glucose transport, 2237
Glutamine
Glutamine: a major energy source for cultured mammalian cells, 121
Glutathione
New aspects of glutathione biochemistry and transport: selective alteration of glutathione metabolism, 3031
Gonadotropin-releasing hormone
Gonadotropin-releasing hormone: molecular and cell biology, physiology, and clinical applications, 2351
Guanethidine
Effects of captopril on the development of tolerance to guanethidine, 1342
Gut peptides
Gut peptides and postprandial satiety, 2889

H

-2D-restricted cytolytic T cells
Helper cell-independent clonal expansion of H-2D-restricted cytolytic T cells, 268
Heart
Muscarinic regulation of phosphatidylinositol turnover and cyclic nucleotide metabolism in the heart, 2613
Heavy metal toxicity
Calmodulin: its potential role in cell proliferation and heavy metal toxicity, 2995
Hepatic metabolism
Application of ^{13}C and ^{31}P NMR to the study of hepatic metabolism, 2657
Hepatic transport kinetics
Determining hepatic transport kinetics by mathematical modeling, 161
Hepatocyte
Hepatocyte DNA replication: effect of nutrients and intermediary metabolites, 131
Lysosomal pathways in hepatic protein degradation: regulatory role of amino acids, 1289
Hexose transport
Hexose uptake regulation mediated through aerobic pathways: schism in a fibroblast mutant, 2242
Photoaffinity labeling of the stereospecific D-glucose transport system with cytochalasin B, 2258
Regulation of hexose transporters of chicken embryo fibroblasts during glucose starvation, 2262
Hormones
Factors affecting the differentiation of epithelial transport and responsiveness to hormones, 2221
Human class II genes
Analysis by molecular cloning of the human class II genes, 3025
Hypertension
Essential hypertension: are catecholamines involved, 45
Overview: the role of angiotensin-converting enzyme inhibitors in cardiovascular therapy, 1314
Protection of the blood-brain barrier during acute and chronic hypertension, 205
The role of vasopressin in hypertension, 103

I

-A_α
Structure, regulatory polymorphisms, and allelic hypervariability regions in murine I-A_α, 3021
Idiotype network
Parallel sets and the internal image of antigen within the idiotypic network, 2558
Immune response
Immune response to tumors, 2459
Parasitic infection, nutrition, and immune response, 251
Immunoglobulin, surface
Role of surface immunoglobulin in B lymphocyte activation, 2624
Indoleamines
Catecholamines and indoleamines in retina, 2697
Inflammation
Inflammation and wound repair, 2791
Inflammatory mediators
IgE-mediated triggering signals for mediator release from human mast cells and basophils, 2840
Insulin
Effects of insulin on cardiac lysosomes and protein degradation, 1295
One transporter per vesicle: determination of the basis of the insulin effect on glucose transport, 2237
Interleukin 1
Control of protein degradation in muscle by prostaglandins, Ca^{2+}, and leukocytic pyrogen (interleukin 1), 1301
Intestinal parasites
Impact of intestinal parasites on digestive function in humans, 246
Invertebrates
Anaerobic energy metabolism of invertebrates, 220
Ion transport
Ion transport processes in apical membranes of epithelia, 2473
Ion transport processes in basolateral membranes of epithelia, 2488
Neuromodulation of intestinal ion transport, 2929
Ischemia
Tracer exchange in the normal and ischemic coronary circulation, 164

J

unctional permeability
Modulation of junctional permeability, 2692

K

idney
Glomerular and postglomerular transcapillary exchange in dog kidney, 171
Renal α adrenoceptors, 2917

Kindling
Role of neurotransmitters in seizure mechanisms in the kindling model of epilepsy, 2516

Lactation
Nutritional and physiological factors affecting lactation, 2430

Lectures

A novel eukaryotic promoter element: the simian virus 40 72 base pair repeat, 226
New aspects of glutathione biochemistry and transport: selective alteration of glutathione metabolism, 3031
Leucine transport
Genetic studies of leucine transport in mammalian cells, 2269
Leukocytes
Mechanisms coupling stimulation and function in leukocytes, 2729
The motor of leukocytes, 2760
Lipopolysaccharides
Regulation of the host response to bacterial lipopolysaccharides, 2755
Lysosomes
Lysosomal pathways in hepatic protein degradation: regulatory role of amino acids, 1289

Macrophages
Electrophysiological properties of macrophages, 2385
Phospholipidosis in the alveolar macrophage induced by cationic amphiphilic drugs, 2578
Malnutrition
The impact of malnutrition on human lactation: observations from community studies, 2432
Mast cell granules
Inflammatory responses to mast cell granules, 2846
Mathematical model
The modeling of tracer exchange and sequestration in the liver, 154
MDCK line
Biophysics of domes formed by the renal cell line Madin-Darby canine kidney, 2217
The action of epinephrine on Madin-Darby canine kidney cells, 2225
Medicinal agents
Blood platelet function, medicinal agents, and other chemical entities, 1382
Melittin
Sequential events in calmodulin on binding with calcium and interaction with target enzymes, 3000
Membrane dynamics
Membrane dynamics: flow routes and quantitation of membrane transport and recycling, 2884
Metabolic control of coronary flow
Evidence against significant resting α-adrenergic coronary vasoconstrictor tone, 2873
Methyl conjugation
Human pharmacogenetics of methyl conjugation, 2303
Milk
human
The effect of prematurity on milk composition and its physiological basis, 2438
yield and composition
Physiological basis of longitudinal changes in human milk yield and composition, 2448
synthesis, rat
Biochemical basis of dietary influences on the synthesis of the macronutrients of rat milk, 2443
Minerals
Historical aspects of minerals and vitamins in parenteral nutrition, 1412

Minisymposium reports

Parallel sets and the internal image of antigen within the idiotypic network, 2558

Minisymposiums

Aminoacyl-tRNA synthetases: structure-function, regulation, and tRNA recognition, 2972–2993
Cell-mediated cytotoxicity, 266–275
Chemistry and molecular biology of Ia/DR, 3021–3030
Complement and cellular triggering reactions, 2540
Immune response to tumors, 2459–2469
Mechanisms coupling stimulation and function in leukocytes, 2729–2763
Mechanisms of mediator release II, 2840–2851
Molecular biology of oncogenic transformation, 2273–2294
Peripheral α-adrenergic receptors, 2908–2928
Regulation of nutrient transport in eukaryotic cells by metabolites and hormones, 2236–2272
Strategies promoting allograft acceptance: an overview, 261–265

Minisymposium summaries

Membrane dynamics: flow routes and quantitation of membrane transport and recycling, 2884
Role of surface immunoglobulin in B lymphocyte activation, 2624
Misaminoacylation
Misaminoacylation by glutaminyl-tRNA synthetase: relaxed specificity in wild-type and mutant enzymes, 2972
MK-521
Initial evaluation of the non-sulfhydryl-containing converting enzyme inhibitor MK-521 in hypertensive humans, 1333
Molecular cloning
Analysis by molecular cloning of the human class II genes, 3025
Monoamines
Ultrastructural localization of monoamines and peptides in rat area postrema, 2949
Monoclonal antibodies
Analysis of epithelial cell surface polarity with monoclonal antibodies, 2208
Analysis of human monoclonal antibodies derived from lymphocytes of patients with cancer, 2465
Monoclonal and anti-idiotypic antibodies as probes for receptor structure and function, 2532
Mononuclear phagocytes
Resolution of pulmonary inflammation, 2799
Multiple-indicator method
Modeling exchange in capillary beds, 148
Multistage carcinogenesis
Cellular targets and host genes in multistage carcinogenesis, 2287
Muscarinic agonists
Mechanisms of muscarinic modulation of protein phosphorylation in intact ventricles, 2618
Muscarinic receptors
Agonist binding to multiple muscarinic receptors, 2785
Development of different electrophysiological mechanisms for muscarinic inhibition of atria and ventricles, 2607
Mutagenicity
Mutagenic food flavonoids, 2454
Myosin light chain kinase
Role of myosin light chain kinase in muscle contraction, 3015

Na-K pump
Electrophysiological properties of macrophages, 2385
Natural suppressor cells
Role of natural suppressor cells in allograft tolerance, 263
Neoplastic transformation
A mutation in actin associated with neoplastic transformation, 2275
Neurohypophyseal peptides
The development of vasopressin antagonists, 87
Neuromodulation
Neuromodulation of intestinal ion transport, 2929
Neuronal connections
Neuronal connections of the area postrema, 2941
Neuropeptides
Behavioral and electrophysiological studies of peptide-induced emesis in dogs, 2952
Neuropeptides and appetite: contribution of neuropharmacological modeling, 2903
Neurotransmitter receptors
Agonist radioligands for identifying functional neurotransmitter receptors, 2765
Neurotransmitters
Neurotransmitters and epilepsy: an overview, 2503
Role of calmodulin in neurotransmitter synthesis, 3011
Neutrophils
Activation of neutrophils by *N*-formyl chemotactic peptides, 2737
Neutrophil stimulation: receptor, membrane, and metabolic events, 2749
Newborn lung
Role of age in amphiphilic drug-induced pulmonary morphological and metabolic responses, 2592

New products

1: 12a, 13a; **5:** 20a, 21a; **9:** ff 2469; **11:** 12a, 13a; **13:** 16a, 17a; **15:** 18a, 19a

News

5, 1279, 2205, 2349, 2471, 2563, 2853, 2936
Nicotinamide
Deprival of nicotinamide leads to enhanced glucose transport in chick embryo fibroblasts, 2265

NMR
NMR approaches to biochemical problems, 2633
Use of ^{31}P and ^{13}C NMR to study enzyme mechanisms, 2640
Noradrenergic presynaptic receptors
The noradrenergic presynaptic receptor controversy, 1351
Noradrenergic tone
Central and peripheral noradrenergic tone in primary hypertension, 47
Norepinephrine release
Support for a role for feedback regulation of norepinephrine release, 1375
Nucleus of the solitary tract
Area postrema and adjacent solitary nucleus in water and energy balance, 2969
Glutamatergic mechanisms in the nucleus tractus solitarius in blood pressure control, 39
Nutrient growth factor interactions
Control of normal and transformed cell proliferation by growth factor-nutrient interactions, 113
Nutrient transport
Regulation of nutrient transport in eukaryotic cells by metabolites and hormones, 2236
Transport of nutrients and hormones through the blood-brain barrier, 201
Transport of potassium, amino acids, and glucose in cells transformed by Rous sarcoma virus, 107
Nutrition
Discovery and importance of zinc in human nutrition, 2829
History and status of zinc in nutrition, 2821
human
Discovery and importance of zinc in human nutrition, 2829
Some experimental approaches to the study of nutrition and parasitic infection, 235
Nutritional policy
Implications of parasite-nutrition interactions from a world perspective, 256

Oncogenic transformation
Molecular biology of oncogenic transformation, 2273
Oxidative drug metabolism
Polymorphic drug oxidation in humans, 2298
Oxytocin
Actions of vasopressin, oxytocin, and synthetic analogs on vascular smooth muscle, 80
Vasopressin and oxytocin in the neural control of the circulation, 97
Vasopressinergic and oxytocinergic pathways in the central nervous system, 91

Pain, animal
Pain perception and alleviation in animals, 1307
Pancreatic islet cells
Electrical pacemaker mechanisms of pancreatic islet cells, 2368
Parallel sets
Parallel sets and the internal image of antigen within the idiotypic network, 2558
Paraoxonase/arylesterase isozymes
The polymorphic paraoxonase/arylesterase isozymes of human serum, 2338
Parasite control projects
Implications of parasite-nutrition interactions from a world perspective, 256
Parasitic infection
Influence of parasitic infection on food intake, 239
Nutrition and parasitic infection, 235
Parasympathetic control of coronary blood flow
Parasympathetic control of coronary blood flow, 2881
Parasympathetic neuroeffector mechanisms
Parasympathetic neuroeffector mechanisms in the heart, 2597
Parenteral nutrition
history
Early history of parenteral nutrition, 1391
pediatrics
History of parenteral nutrition in pediatrics with emphasis on amino acids, 1407
Pentylenetetrazol
Regulatory effects of neurotransmitters on electroshock and pentylenetetrazol seizures, 2521
Peptides
Ultrastructural localization of monoamines and peptides in rat area postrema, 2949
Periventricular forebrain
Periventricular forebrain mechanisms for blood pressure regulation, 25
Pharmacoanthropology
Pharmacoanthropology: drug metabolism, 2326
Pharmacoanthropology: outline, problems, and the nature of case histories, 2314
Pharmacogenetics, human
Human pharmacogenetics, 2295
New directions in pharmacogenetics, 2319
Phosphatidylinositol
Muscarinic regulation of phosphatidylinositol turnover and cyclic nucleotide metabolism in the heart, 2613
Phospholipidosis
Phospholipidosis in the alveolar macrophage induced by cationic amphiphilic drugs, 2578
Phospholipids
Biochemical alterations of membrane lipids associated with renal injury, 2811
Photoaffinity labeling
Photoaffinity labeling of the stereospecific D-glucose transport system with cytochalasin B, 2258
Photomyoclonic epilepsy
Evidence for neurotransmitter abnormalities related to seizure activity in the epileptic baboon, 2510
Pivalopril
Angiotensin-converting enzyme inhibitory and antihypertensive activities of pivalopril (RHC 3659-(S)), 1322
Pregnancy
The impact of malnutrition on human lactation: observations from community studies, 2432
Prematurity
The effect of prematurity on milk composition and its physiological basis, 2438
Pressure-volume relationship
Does the history of contraction affect the pressure-volume relationship?, 2402
Presynaptic α receptors
Controversial evidence regarding the functional importance of presynaptic α receptors, 1371
Prostaglandins
Control of protein degradation in muscle by prostaglandins, Ca^{2+}, and leukocytic pyrogen (interleukin 1), 1301
Protein degradation
Role of protein degradation in the regulation of cellular protein content and amino acid pools, 1283
Protein kinase
NMR studies of the mechanism of cyclic AMP-dependent protein kinase, 2634
Protein structure and function
Two-dimensional NMR approaches to the study of protein structure and function, 2648
Proteolysis
Regulation of intracellular proteolysis, 1281

Public affairs

1: 7a; **2:** 9a; **5:** 7a; **8:** 15a; **9:** 9a; **10:** 9a; **11:** 7a; **12:** 11a; **13:** 9a; **14:** 13a; **15:** 13a
Pulmonary function
Metabolic functions of the lung and systemic vasoregulation, 2574
Pulmonary inflammation
Biochemical factors in pulmonary inflammatory disease, 2807

Retina
Catecholamines and indoleamines in retina, 2697
Retinoids
Modulation of cell growth by retinoids and their possible mechanisms of action, 134

Satiety, postprandial
Gut peptides and postprandial satiety, 2889
Secretory cells
Electrophysiology of secretory cells, 2362
Sensitivity functions
Sensitivity functions in the estimation of parameters of cellular exchange, 180
Serotonergic-cholinergic interactions
Serotonergic-cholinergic interactions in blood pressure control in the rat, 21
Serotonin
Serotonin systems in the inner and outer plexiform layers of the vertebrate retina, 2699
Serotonin *N*-acetyltransferase
Regulation and possible role of serotonin *N*-acetyltransferase in the retina, 2704
Skin repair
Effect of topically applied steroidal and nonsteroidal anti-inflammatory agents on skin repair and regeneration, 2793

Special articles

Extramural instrumentation funding by the National Institutes of Health, 2565
Stimulus-secretion coupling
Role of pH as a transduction device in triggering electrical and secretory responses in islet B cells, 2379
Sympathetic nervous system
Effect of antihypertensive therapy on sympathetic nervous system activity in patients with essential hypertension, 72

Symposium reports

Anaerobic energy metabolism of invertebrates, 220
Mutagenic food flavonoids, 2454
Regional vascular behavior in the gastrointestinal wall, 7

Regulation of vascular smooth muscle contraction, 2390
Transport and metabolism of water-soluble vitamins in intestine and kidney, 2423

Symposiums

Agonist radioligands for identifying functional neurotransmitter receptors, 2765–2790
Area postrema, 2937–2971
Autonomic control of coronary tone: facts, interpretations, and consequences, 2855–2883
Calmodulin, 2994–3020
Catecholamines and indoleamines in retina, 2697–2728
Cell-to-cell communication, 2671–2696
Consequences of pulmonary accumulation of drugs, 2572–2596
Control of cell growth by nutrients, 107–139
Differentiation of epithelial cells, 2207–2235
Electrophysiology of secretory cells, 2362–2389
Epilepsy: neurotransmitter abnormalities as determinants of seizure susceptibility and severity, 2503–2531
Essential hypertension: are catecholamines involved, 45–77
History and status of zinc in nutrition, 2821–2839
Human pharmacogenetics, 2295–2318
Inflammation and wound repair, 2791–2820
Information retrievable from ventricular pressure-volume relationship, 2399–2422
Kinetics of capillary exchange, 147–184
Neuropeptidergic regulation of food intake, 2888–2907
New directions in pharmacogenetics, 2319–2347
NMR approaches to biochemical problems, 2633–2670
Nonadrenergic central control of blood pressure, 16–44
Nutritional and physiological factors affecting lactation, 2430–2453
Nutrition and parasitic infection, 235–260
Parasympathetic neuroeffector mechanisms in the heart, 2597–2623
Regulation of intracellular proteolysis, 1281–1306
Research forum: angiotensin-converting enzyme inhibitors, 1313–1350
The blood-brain barrier, 185–219
The noradrenergic presynaptic receptor controversy, 1351–1381
Total parenteral nutrition, 1390–1416
Vasopressin and cardiovascular regulation, 78–106

Symposium summaries

Blood platelet function, medicinal agents, and other chemical entities, 1382
Evaluation of anticonvulsant drugs in genetic animal models of epilepsy, 276
GnRH regulation of the gonadotropins, 2351
Ion transport processes in apical membranes of epithelia, 2473
Ion transport processes in basolateral membranes of epithelia, 2488
Monoclonal and anti-idiotypic antibodies as probes for receptor structure and function, 2532
Neuromodulation of intestinal ion transport, 2929
Pain perception and alleviation in animals, 1307

T

Time-varying elastance
Clinical use of pressure-dimension and stress-shortening relations in systole and diastole, 2414
Topical epilepsy
Evidence for a role of neurotransmitters in the mechanism of topical convulsant models, 2525
Total parenteral nutrition
Total parenteral nutrition, 1390
Transcapillary exchange
Glomerular and postglomerular transcapillary exchange in dog kidney, 171
Transfection
Characterization of a human transforming gene isolated from T24 bladder carcinoma cells, 2280
Transformation
Molecular events leading to enhanced glucose transport in Rous sarcoma virus-transformed cells, 2246
Translocation hypothesis
Translocation hypothesis of insulin action on glucose transport, 2256
tRNA
^{13}C NMR studies of dynamics and synthetase interaction of [4-^{13}C]uracil-labeled *Escherichia coli* tRNAs, 2984
tRNA synthetases
Misaminoacylation by glutaminyl-tRNA synthetase: relaxed specificity in wild-type and mutant enzymes, 2972
Tryptophanyl-tRNA synthetase
Crystallization of substrate and product analog complexes of tryptophanyl-tRNA synthetase, 2981
Tumor immunity
Differential antigen presentation in tumor immunity, 2460
Tumors
Immune response to tumors, 2459
Two-dimensional NMR
Two-dimensional NMR approaches to the study of protein structure and function, 2648
Tyrosine hydroxylase
Regulation of retinal dopamine biosynthesis and tyrosine hydroxylase activity by light, 2709

V

Vascular smooth muscle
Actions of vasopressin, oxytocin, and synthetic analogs on vascular smooth muscle, 80
Postsynaptic α adrenoceptors on vascular smooth muscle, 2923
Regulation of vascular smooth muscle contraction, 2390
Vasopressin
Vasopressin and cardiovascular regulation, 78
Virus-transformed cells
Control of normal and transformed cell proliferation by growth factor-nutrient interactions, 113
Vitamins
Historical aspects of minerals and vitamins in parenteral nutrition, 1412
Vomiting center
Role of the area postrema in vomiting and related functions, 2955

W

Water-soluble vitamins
Transport and metabolism of water-soluble vitamins in intestine and kidney, 2423
Wound repair
Inflammation and wound repair, 2791

Z

Zinc
History and status of zinc in nutrition, 2821
Zinc deficiency
Domestic animals in the elucidation of zinc's role in nutrition, 2823
Zinc metabolism
Use of laboratory animals to define physiological functions and bioavailability of zinc, 2835

Contents of Volume 43

BOOKS RECEIVED ... 6

SYMPOSIUM REPORT

Regional vascular behavior in the gastrointestinal wall. *H. G. Bohlen* 7

SYMPOSIUMS

Nonadrenergic Central Control of Blood Pressure

Chaired by *S. E. Robinson*

Introduction. *S. E. Robinson* ... 16
Cardiovascular regulation by brain acetylcholine. *H. E. Brezenoff* 17
Serotonergic-cholinergic interactions in blood pressure control in the rat. *S. E. Robinson* ... 21
Periventricular forebrain mechanisms for blood pressure regulation. *J. Buggy, S. Huot, M. Pamnani, and F. Haddy* ... 25
Central γ-aminobutyric acid involvement in blood pressure control. *R. A. Gillis, K. A. Yamada, J. A. DiMicco, D. J. Williford, S. A. Segal, P. Hamosh, and W. P. Norman* ... 32
Glutamatergic mechanisms in the nucleus tractus solitarius in blood pressure control. *W. T. Talman, A. R. Granata, and D. J. Reis* 39

Essential Hypertension: Are Catecholamines Involved?

Chaired by *C. R. Lake*

Introduction. *C. R. Lake* ... 45
Central and peripheral noradrenergic tone in primary hypertension. *V. DeQuattro, P. Sullivan, R. Minagawa, I. Kopin, J. Bornheimer, A. Foti, and R. Barndt* ... 47
Plasma catecholamine levels in normal subjects and in patients with secondary hypertension. *C. R. Lake, B. Chernow, D. S. Goldstein, D. G. Glass, M. Coleman, and M. G. Ziegler* ... 52
Plasma norepinephrine and epinephrine levels in essential hypertension. *D. S. Goldstein and C. R. Lake* ... 57
Autonomic degeneration and altered blood pressure control in humans. *M. G. Ziegler and C. R. Lake* ... 62
Pharmacologic tools for assessment of adrenergic nerve activity in human hypertension. *H. Ibsen and S. Julius* ... 67
Effect of antihypertensive therapy on sympathetic nervous system activity in patients with essential hypertension. *B. Chernow, G. P. Zaloga, C. R. Lake, M. D. Coleman, and M. G. Ziegler* ... 72

Vasopressin and Cardiovascular Regulation

Chaired by *L. Share*

Introduction. *L. Share* ... 78
Actions of vasopressin, oxytocin, and synthetic analogs on vascular smooth muscle. *B. M. Altura and B. T. Altura* ... 80
The development of vasopressin antagonists. *W. H. Sawyer and M. Manning* ... 87
Vasopressinergic and oxytocinergic pathways in the central nervous system. *E. A. Zimmerman, G. Nilaver, A. Hou-Yu, and A. J. Silverman* 91
Vasopressin and oxytocin in the neural control of the circulation. *P. G. Schmid, F. M. Sharabi, G. B. Guo, F. M. Abboud, and M. D. Thames* ... 97
The role of vasopressin in hypertension. *L. Share and J. T. Crofton* 103

Control of Cell Growth by Nutrients

Chaired by *J. F. Lechner and W. L. McKeehan*

Transport of potassium, amino acids, and glucose in cells transformed by Rous sarcoma virus. *M. J. Weber, P. K. Evans, M. A. Johnson, T. F. McNair, K. D. Nakamura, and D. W. Salter* ... 107
Control of normal and transformed cell proliferation by growth factor-nutrient interactions. *W. L. McKeehan* ... 113
Interdependent regulation of epithelial cell replication by nutrients, hormones, growth factors, and cell density. *J. F. Lechner* ... 116
Glutamine: a major energy source for cultured mammalian cells. *H. R. Zielke, C. L. Zielke, and P. T. Ozand* ... 121
Role of cholesterol metabolism in cell growth. *H. W. Chen* ... 126
Hepatocyte DNA replication: effect of nutrients and intermediary metabolites. *J. A. McGowan, W. E. Russell, and N. L. R. Bucher* 131
Modulation of cell growth by retinoids and their possible mechanisms of action. *A. M. Jetten* ... 134

Number 2. FEBRUARY 1984

FEDERATION NEWS ... 141

SYMPOSIUMS

Kinetics of Capillary Exchange

Chaired by *J. A. Jacquez*

Introduction. *J. A. Jacquez* ... 147
Modeling exchange in capillary beds. *J. A. Jacquez* ... 148
The modeling of tracer exchange and sequestration in the liver. *C. A. Goresky* ... 154
Determining hepatic transport kinetics by mathematical modeling. *B. A. Luxon and E. L. Forker* ... 161
Tracer exchange in the normal and ischemic coronary circulation. *T. R. Harris, K. A. Overholser, and J. C. Collins* ... 164
Glomerular and postglomerular transcapillary exchange in dog kidney. *M. Silverman, C. Whiteside, and C. Trainor* ... 171
Sensitivity functions in the estimation of parameters of cellular exchange. *J. B. Bassingthwaighte and M. Chaloupka* ... 180

The Blood-Brain Barrier

Chaired by *D. D. Heistad*

Introduction. *D. D. Heistad* ... 185
The structure and function of the blood-brain barrier. *M. W. B. Bradbury* ... 186
Use of isolated brain capillaries and cultured endothelial cells to study the blood-brain barrier. *G. W. Goldstein, A. L. Betz, and P. D. Bowman* ... 191
Deoxynucleoside and vitamin transport into the central nervous system. *R. Spector and J. Eells* ... 196
Transport of nutrients and hormones through the blood-brain barrier. *W. M. Pardridge* ... 201

Protection of the blood-brain barrier during acute and chronic hypertension. *D. D. Heistad* 205
The role of arachidonic acid in vasogenic brain edema. *P. H. Chan and R. A. Fishman* 210
Modification of the blood-brain barrier in chemotherapy of malignant brain tumors. *E. A. Neuwelt and S. I. Rapoport* 214

SYMPOSIUM REPORT

Anaerobic energy metabolism of invertebrates. *C. S. Hammen and W. R. Ellington* 220

LECTURE

A novel eukaryotic promoter element: the simian virus 40 72 base pair repeat. *B. Wasylyk, C. Wasylyk, and P. Chambon* 226

SYMPOSIUM

Nutrition and Parasitic Infection

Chaired by *M. C. Nesheim*

Some experimental approaches to the study of nutrition and parasitic infection. *M. C. Nesheim* 235
Influence of parasitic infection on food intake. *D. W. T. Crompton* 239
Impact of intestinal parasites on digestive function in humans. *I. H. Rosenberg and B. B. Bowman* 246
Parasitic infection, nutrition, and immune response. *R. K. Chandra* 251
Implications of parasite-nutrition interactions from a world perspective. *Z. S. Pawlowski* 256

MINISYMPOSIUMS

Strategies Promoting Allograft Acceptance

Chaired by *S. Strober*

An overview. *S. Strober* 261
Role of natural suppressor cells in allograft tolerance. *S. Strober, S. Okada, and A. Oseroff* 263

Cell-Mediated Cytotoxicity

Chaired by *S. J. Burakoff*

An overview. *S. J. Burakoff* 266
Helper cell-independent clonal expansion of H-2D-restricted cytolytic T cells. *H. von Boehmer and P. Kisielow* 268
Cytotoxic T lymphocyte recognition of class I H-2 antigens after DNA-mediated gene transfer. *C. S. Reiss, G. A. Evans, C. Murre, D. H. Margulies, J. G. Seidman, and S. J. Burakoff* 271

SYMPOSIUM SUMMARY

Evaluation of anticonvulsant drugs in genetic animal models of epilepsy. *W. Löscher and B. S. Meldrum* 276

Number 3. MARCH 1, 1984

Abstracts of papers presented at the Federation Annual Meeting 285

Number 4. MARCH 5, 1984

Abstracts of papers presented at the Federation Annual Meeting 791

Number 5. APRIL 1984

NEWS ... 1279

BOOKS RECEIVED ... 1280

SYMPOSIUM

Regulation of Intracellular Proteolysis

Chaired by *G. E. Mortimore*

Introductory remarks. *G. E. Mortimore* 1281
Role of protein degradation in the regulation of cellular protein content and amino acid pools. *O. A. Scornik* 1283
Lysosomal pathways in hepatic protein degradation: regulatory role of amino acids. *G. E. Mortimore and A. R. Pösö* 1289
Effects of insulin on cardiac lysosomes and protein degradation. *W. M. Long, B. H. L. Chua, B. L. Munger, and H. E. Morgan* 1295
Control of protein degradation in muscle by prostaglandins, Ca^{2+}, and leukocytic pyrogen (interleukin 1). *A. L. Goldberg, V. Baracos, P. Rodemann, L. Waxman, and C. Dinarello* 1301

SYMPOSIUM SUMMARY

Pain perception and alleviation in animals. *H. H. Erickson and R. L. Kitchell* 1307

SYMPOSIUMS

Research Forum: Angiotensin-Converting Enzyme Inhibitors

Chaired by *W. Abrams and R. McCaa*

Introduction. *W. B. Abrams* 1313
Overview: the role of angiotensin-converting enzyme inhibitors in cardiovascular therapy. *W. B. Abrams, R. O. Davies, and R. K. Ferguson* 1314
Angiotensin-converting enzyme inhibitory and antihypertensive activities of pivalopril (RHC 3659-(S)). *P. S. Wolf, W. S. Mann, J. T. Suh, B. Loev, and R. D. Smith* 1322
CI-906 and CI-907: new orally active nonsulfhydryl angiotensin-converting enzyme inhibitors. *H. R. Kaplan, D. M. Cohen, A. D. Essenburg, T. C. Major, T. E. Mertz, and M. J. Ryan* 1326
Antihypertensive profile of the angiotensin-converting enzyme inhibitors CI-906 and CI-907. *M. J. Ryan, D. M. Boucher, D. M. Cohen, B. J. Olszewski, R. M. Singer, R. D. Smith, and H. R. Kaplan* 1330
Initial evaluation of the non-sulfhydryl-containing converting enzyme inhibitor MK-521 in hypertensive humans. *H. H. Rotmensch, M. Vincent, P. H. Vlasses, B. N. Swanson, J. D. Irvin, M. Hichens, K. E. Harris, and R. K. Ferguson* 1333
Effects of captopril and enalapril on sodium excretion and blood pressure in sodium-deficient dogs. *R. E. McCaa and J. B. Gillespie* 1336
Effects of captopril on the development of tolerance to guanethidine. *G. O. Rankin and G. J. Haas, Jr.* 1342
Acute antihypertensive synergism of angiotensin-converting enzyme inhibitors and diuretics. *P. S. Chan, M. A. Ronsberg, and P. Cervoni* 1346

The Noradrenergic Presynaptic Receptor Controversy

Chaired by *S. Kalsner*

Introduction. *S. Kalsner* 1351
Evidence that noradrenergic transmitter release is regulated by presynaptic receptors. *T. C. Westfall* 1352
Limitations of presynaptic theory: no support for feedback control of autonomic effectors. *S. Kalsner* 1358
Presynaptic α-receptor control of adrenergic transmitter release in blood vessels. *J. A. Bevan, F. M. Tayo, R. A. Rowan, and R. D. Bevan* 1365
Controversial evidence regarding the functional importance of presynaptic α receptors. *N. W. Robie* 1371
Support for a role for feedback regulation of norepinephrine release. *S. M. Kirpekar* 1375
Peripheral presynaptic adrenoreceptor regulation of norepinephrine release in humans. *G. A. FitzGerald* 1379

SYMPOSIUM SUMMARY

Blood platelet function, medicinal agents, and other chemical entities. *A. Lasslo* 1382

SYMPOSIUM

Total Parenteral Nutrition

Chaired by *H. G. Day*

Introductory remarks. *H. G. Day* 1390
Early history of parenteral nutrition. *S. M. Levenson, B. S. Hopkins, M. Waldron, J. E. Canham, and E. Seifter* 1391
History of parenteral nutrition in pediatrics with emphasis on amino acids. *R. W. Winters, W. C. Heird, and R. B. Dell* 1407
Historical aspects of minerals and vitamins in parenteral nutrition. *M. E. Shils* 1412

Number 6. MAY 1, 1984

Abstracts of papers presented at the ASBC/AAI Annual Meeting 1417

Number 7. MAY 4, 1984

Abstracts of papers presented at the ASBC/AAI Annual Meeting 1841

Number 8. MAY 15, 1984

NEWS ... 2205

SYMPOSIUM

Differentiation of Epithelial Cells

Chaired by *M. Cereijido*

Introduction. *M. Cereijido* 2207
Analysis of epithelial cell surface polarity with monoclonal antibodies. *G. K. Ojakian and D. A. Herzlinger* 2208
Biophysics of domes formed by the renal cell line Madin-Darby canine kidney. *C. Tanner, D. A. Frambach, and D. S. Misfeldt* 2217
Factors affecting the differentiation of epithelial transport and responsiveness to hormones. *J. S. Handler, A. S. Preston, and R. E. Steele* 2221
The action of epinephrine on Madin-Darby canine kidney cells. *N. L. Simmons, C. D. A. Brown, and E. L. Rugg* 2225
Electrical properties of Madin-Darby canine kidney cells. *M. Cereijido* 2230

MINISYMPOSIUMS

Regulation of Nutrient Transport in Eukaryotic Cells by Metabolites and Hormones

Chaired by *H. M. Kalckar*

Introduction. *H. M. Kalckar* 2236
One transporter per vesicle: determination of the basis of the insulin effect on glucose transport. *J. C. Gorga and G. E. Lienhard* 2237
Hexose uptake regulation mediated through aerobic pathways: schism in a fibroblast mutant. *H. M. Kalckar and D. B. Ullrey* 2242
Molecular events leading to enhanced glucose transport in Rous sarcoma virus-transformed cells. *M. J. Weber, K. D. Nakamura, and D. W. Salter* 2246
Insulin-induced translocation of intracellular glucose transporters in the isolated rat adipose cell. *S. W. Cushman, L. J. Wardzala, I. A. Simpson, E. Karnieli, P. J. Hissin, T. J. Wheeler, P. C. Hinkle, and L. B. Salans* 2251
Translocation hypothesis of insulin action on glucose transport. *T. Kono* 2256
Photoaffinity labeling of the stereospecific D-glucose transport system with cytochalasin B. *J. E. Pessin, L. G. Tillotson, K. J. Isselbacher, and M. P. Czech* 2258
Regulation of hexose transporters of chicken embryo fibroblasts during glucose starvation. *L. G. Tillotson, K. Yamada, and K. J. Isselbacher* 2262
Deprival of nicotinamide leads to enhanced glucose transport in chick embryo fibroblasts. *H. Amos, K. G. Mandel, and R. J. Gay* 2265
Genetic studies of leucine transport in mammalian cells. *M. A. Shotwell, C. D. Lobatón, E. J. Collarini, A. Moreno, R. E. Giles, and D. L. Oxender* 2269

Molecular Biology of Oncogenic Transformation

Chaired by *T. Kakunaga*

Introduction. *T. Kakunaga* 2273
A mutation in actin associated with neoplastic transformation. *T. Kakunaga, J. Leavitt, and H. Hamada* 2275
Characterization of a human transforming gene isolated from T24 bladder carcinoma cells. *E. Santos, S. Pulciani, and M. Barbacid* 2280
Cellular targets and host genes in multistage carcinogenesis. *I. B. Weinstein, S. Gattoni-Celli, P. Kirschmeier, W. Hsiao, A. Horowitz, and A. Jeffrey* 2287

SYMPOSIUMS

Human Pharmacogenetics

Chaired by *R. M. Weinshilboum*

Introduction. *R. M. Weinshilboum* 2295
Polymorphic drug oxidation in humans. *M. Eichelbaum* 2298
Human pharmacogenetics of methyl conjugation. *R. M. Weinshilboum* 2303
In vitro assessment of pharmacogenetic susceptibility to toxic drug metabolites in humans. *S. P. Spielberg* 2308
Pharmacoanthropology: outline, problems, and the nature of case histories. *W. Kalow* 2314

New Directions in Pharmacogenetics

Chaired by *E. S. Vesell*

Introduction. *E. S. Vesell* 2319
Pharmacoanthropology: drug metabolism. *W. Kalow* 2326
Acetylation pharmacogenetics: experimental models for human toxicity. *W. W. Weber* 2332
The polymorphic paraoxonase/arylesterase isozymes of human serum. *B. N. La Du and H. W. Eckerson* 2338
A new polymorphism of hepatic drug oxidation in humans: family studies of antipyrine metabolites. *E. S. Vesell and M. B. Penno* 2342

Gonadotropin-releasing hormone: molecular and cell biology, physiology, and clinical applications. *P. M. Conn, A. J. W. Hsueh, and W. F. Crowley, Jr.* 2351

SYMPOSIUM

Electrophysiology of Secretory Cells

Chaired by *C. S. Pace*

Introduction and overview. *C. S. Pace* 2362
Acetylcholine-induced potential fluctuations and underlying currents in rat adrenal chromaffin cells. *Y. Kidokoro* 2364
Electrical pacemaker mechanisms of pancreatic islet cells. *D. L. Cook* 2368
Electrical activity in adenohypophyseal cells and effects of hypophyseotropic substances. *P. S. Taraskevich and W. W. Douglas* 2373
Role of pH as a transduction device in triggering electrical and secretory responses in islet B cells. *C. S. Pace* 2379
Electrophysiological properties of macrophages. *E. K. Gallin* .. 2385

SYMPOSIUM REPORT

Regulation of vascular smooth muscle contraction. *C. L. Seidel* 2390

SYMPOSIUM

End-Systolic Pressure-Volume Relationship in Retrospect and Prospect

Chaired by *K. Sagawa*

Introduction. *K. Sagawa* 2399
Does the history of contraction affect the pressure-volume relationship? *G. Elzinga and N. Westerhof* 2402
Factors affecting the end-systolic pressure-volume relationship. *W. L. Maughan and K. Sunagawa* 2408
Energetics of ventricular contraction as traced in the pressure-volume diagram. *H. Suga, O. Yamada, and Y. Goto* 2411
Clinical use of pressure-dimension and stress-shortening relations in systole and diastole. *K. M. Borow and W. Grossman* 2414
Applications and limitations of end-systolic measures of ventricular performance. *J. Ross, Jr.* 2418

SYMPOSIUM REPORT

Transport and metabolism of water-soluble vitamins in intestine and kidney. *R. C. Rose, A. M. Hoyumpa, Jr., R. H. Allen, H. M. Middleton, III, L. M. Henderson, and I. H. Rosenberg* 2423

SYMPOSIUM

Nutritional and Physiological Factors Affecting Lactation

Chaired by *D. E. Bauman*

Introduction. *D. E. Bauman and M. C. Neville* 2430
The impact of malnutrition on human lactation: observations from community studies. *W. A. Coward, A. A. Paul, and A. M. Prentice* 2432
The effect of prematurity on milk composition and its physiological basis. *G. H. Anderson* 2438
Biochemical basis of dietary influences on the synthesis of the macronutrients of rat milk. *D. H. Williamson, M. R. Munday, and R. G. Jones* 2443
Physiological basis of longitudinal changes in human milk yield and composition. *P. E. Hartmann and C. G. Prosser* 2448

SYMPOSIUM REPORT

Mutagenic food flavonoids. *B. Stavric* 2454

MINISYMPOSIUM

Immune Response to Tumors

Chaired by *M. I. Greene*

Introduction. *M. I. Greene* 2459
Differential antigen presentation in tumor immunity. *S. Schatten, J. A. Drebin, R. D. Granstein, and M. I. Greene* 2460
Analysis of human monoclonal antibodies derived from lymphocytes of patients with cancer. *R. J. Cote, D. M. Morrissey, H. F. Oettgen, and L. J. Old* 2465

Ion transport processes in apical membranes of epithelia. *D. G. Warnock, R. Greger, P. B. Dunham, M. A. Benjamin, R. A. Frizzell, M. Field, K. R. Spring, H. E. Ives, P. S. Aronson, and J. Seifter* 2473

SYMPOSIUM SUMMARY

Ion transport processes in basolateral membranes of epithelia. *L. Reuss, S. A. Lewis, N. K. Wills, S. I. Helman, T. C. Cox, W. F. Boron, A. W. Siebens, W. B. Guggino, G. Giebisch, and S. G. Schultz* 2488

SYMPOSIUM

Epilepsy: Neurotransmitter Abnormalities as Determinants of Seizure Susceptibility and Severity

Chaired by *P. C. Jobe, J. W. Dailey, and H. E. Laird II*

Neurotransmitters and epilepsy: an overview. *P. C. Jobe* 2503
Neurotransmitter abnormalities in genetically epileptic rodents. *H. E. Laird II, J. W. Dailey, and P. C. Jobe* 2505
Evidence for neurotransmitter abnormalities related to seizure activity in the epileptic baboon. *E. K. Killam and K. F. Killam, Jr.* 2510
Role of neurotransmitters in seizure mechanisms in the kindling model of epilepsy. *J. O. McNamara* 2516
Regulatory effects of neurotransmitters on electroshock and pentylenetetrazol seizures. *E. S. Burley and J. A. Ferrendelli* 2521
Evidence for a role of neurotransmitters in the mechanism of topical convulsant models. *C. R. Craig* 2525
Neurotransmitters and epilepsy: distinguishing characteristics and unifying precepts. *D. M. Woodbury* 2529

SYMPOSIUM SUMMARY

Monoclonal and anti-idiotypic antibodies as probes for receptor structure and function. *J. C. Venter, J. A. Berzofsky, J. Lindstrom, S. Jacobs, C. M. Fraser, L. D. Kohn, W. J. Schneider, G. L. Greene, A. D. Strosberg, and B. F. Erlanger* 2532

MINISYMPOSIUM

Complement and Cellular Triggering Reactions

Chaired by *T. E. Hugli*

Introductory remarks. *T. E. Hugli* 2540
Anaphylatoxin-mediated regulation of human and murine immune responses. *E. L. Morgan, W. O. Weigle, and T. E. Hugli* 2543
Role of complement in the immune response. *T. L. Feldbush, M. V. Hobbs, C. D. Severson, Z. K. Ballas, and J. M. Weiler* ... 2548
Structure and function of the human C3b receptor. *D. T. Fearon* 2553

MINISYMPOSIUM REPORT

Parallel sets and the internal image of antigen within the idiotypic network. *C. A. Bona* 2558

Role of surface immunoglobulin in B lymphocyte activation. *F. D. Finkelman and E. S. Vitetta* 2624

SYMPOSIUM

NMR Approaches to Biochemical Problems

Chaired by *A. S. Mildvan*

Introduction. *A. S. Mildvan* 2633
NMR studies of the mechanism of cyclic AMP-dependent protein kinase. *A. S. Mildvan, E. T. Kaiser, P. R. Rosevear, and H. N. Bramson* 2634
Use of ^{31}P and ^{13}C NMR to study enzyme mechanisms. *J. J. Villafranca* 2640
Two-dimensional NMR approaches to the study of protein structure and function. *J. L. Markley, W. M. Westler, T.-M. Chan, C. L. Kojiro, and E. L. Ulrich* 2648
Application of ^{13}C and ^{31}P NMR to the study of hepatic metabolism. *S. M. Cohen* 2657
Dynamics of DNA duplexes containing internal G·T, G·A, A·C, and T·C pairs: hydrogen exchange at and adjacent to mismatch sites. *D. J. Patel, S. A. Kozlowski, S. Ikuta, and K. Itakura* 2663

Number 12. SEPTEMBER 1984

SYMPOSIUMS

Cell-to-Cell Communication

Chaired by *W. C. De Mello*

Introductory remarks. *W. C. De Mello* 2671
Molecular organization of gap junctions. *J.-P. Revel, B. J. Nicholson, and S. B. Yancey* 2672
The biosynthesis of gap junctions. *N. B. Gilula* 2678
Gap junction structure and cell-to-cell coupling regulation: Is there a calmodulin involvement? *C. Peracchia and G. Bernardini* ... 2681
Modulation of junctional permeability. *W. C. De Mello* 2692

Catecholamines and Indoleamines in Retina

Chaired by *P. M. Iuvone*

Introduction. *P. M. Iuvone* 2697
Serotonin systems in the inner and outer plexiform layers of the vertebrate retina. *D. A. Redburn* 2699
Regulation and possible role of serotonin *N*-acetyltransferase in the retina. *J. C. Besharse, D. A. Dunis, and P. M. Iuvone* 2704
Regulation of retinal dopamine biosynthesis and tyrosine hydroxylase activity by light. *P. M. Iuvone* 2709
Modulation of [^{3}H]dopamine release from rabbit retina. *M. L. Dubocovich* 2714
Pharmacological properties and localization of dopamine-sensitive adenylate cyclase in the carp retina. *R. Van Buskirk and K. J. Watling* 2719
Identification of epinephrine and phenylethanolamine *N*-methyltransferase activity in rat retina. *J. Cohen and M. Hadjiconstantinou* 2725

MINISYMPOSIUM

Mechanisms Coupling Stimulation and Function in Leukocytes

Chaired by *T. Stossel, G. Weissmann, and C. G. Cochrane*

Introduction. *C. G. Cochrane* 2729
Mobilization and adaptation of human neutrophil chemoattractant fMet-Leu-Phe receptors. *J. I. Gallin and B. E. Seligmann* 2732
Activation of neutrophils by *N*-formyl chemotactic peptides. *R. G. Painter, L. A. Sklar, A. J. Jesaitis, M. Schmitt, and C. G. Cochrane* 2737
Regulatory mechanisms of a chemoattractant receptor on leukocytes. *R. Snyderman* 2743
Neutrophil stimulation: receptor, membrane, and metabolic events. *H. M. Korchak, K. Vienne, L. E. Rutherford, and G. Weissmann* 2749
Regulation of the host response to bacterial lipopolysaccharides. *R. J. Ulevitch, P. S. Tobias, and J. C. Mathison* 2755
The motor of leukocytes. *T. P. Stossel, J. H. Hartwig, H. L. Yin, F. S. Southwick, and K. S. Zaner* 2760

Number 13. OCTOBER 1984

SYMPOSIUMS

Agonist Radioligands for Identifying Functional Neurotransmitter Receptors

Chaired by *W. R. Roeske*

Introduction. *W. R. Roeske* 2765
Benzodiazepine receptor heterogeneity: possible molecular basis and functional significance. *K. W. Gee, S. H. Yamamura, W. R. Roeske, and H. I. Yamamura* 2767

Biochemical pharmacology of the γ-aminobutyric acid receptor/ionophore protein. *R. W. Olsen, E. H. F. Wong, G. B. Stauber, and R. G. King* 2773
Agonist interactions with dopamine receptors: focus on radioligand-binding studies. *I. Creese, D. R. Sibley, and S. E. Leff* 2779
Agonist binding to multiple muscarinic receptors. *T. W. Vickroy, M. Watson, H. I. Yamamura, and W. R. Roeske* 2785

Inflammation and Wound Repair

Chaired by *P. C. Merker*

Introduction to and philosophy of the symposium. *P. C. Merker* 2791
Effect of topically applied steroidal and nonsteroidal anti-inflammatory agents on skin repair and regeneration. *O. M. Alvarez, K. D. Levendorf, R. V. Smerbeck, P. M. Mertz, and W. H. Eaglstein* 2793
Resolution of pulmonary inflammation. *P. M. Henson, G. L. Larsen, J. E. Henson, S. L. Newman, R. A. Musson, and C. C. Leslie* ... 2799
Biochemical factors in pulmonary inflammatory disease. *I. Schrauf-statter, S. D. Revak, and C. G. Cochrane* 2807
Biochemical alterations of membrane lipids associated with renal injury. *A. R. Morrison, N. Pascoe, N. Tauk, and D. Kennerly* .. 2811
Pharmacological inhibition of excessive collagen deposition in fibrotic diseases. *J. Uitto, L. Ryhänen, E. M. L. Tan, A. I. Oikarinen, and E. J. Zaragoza* 2815

History and Status of Zinc in Nutrition

Chaired by *B. L. O'Dell*

Introduction. *B. L. O'Dell* 2821
Domestic animals in the elucidation of zinc's role in nutrition. *R. W. Luecke* 2823
Discovery and importance of zinc in human nutrition. *A. S. Prasad* 2829
Use of laboratory animals to define physiological functions and bioavailability of zinc. *R. M. Forbes* 2835

MINISYMPOSIUM

Mechanisms of Mediator Release II

Chaired by *M. A. Kaliner*

IgE-mediated triggering signals for mediator release from human mast cells and basophils. *T. Ishizaka, D. H. Conrad, E. S. Schulman, A. R. Sterk, C. G. L. Ko, and K. Ishizaka* 2840
Inflammatory responses to mast cell granules. *M. Kaliner and R. Lemanske* 2846

Number 14. NOVEMBER 1984

NEWS ... 2853

BOOKS RECEIVED ... 2854

SYMPOSIUM

Autonomic Control of Coronary Tone: Facts, Interpretations, and Consequences

Chaired by *P. M. Vanhoutte*

Why nerves to coronary vessels? *J. T. Shepherd and P. M. Vanhoutte* 2855
Adrenergic control of coronary arteries. *R. S. Moreland and D. F. Bohr* 2857
Effects of the adrenergic transmitter on epicardial coronary arteries. *R. A. Cohen, J. T. Shepherd, and P. M. Vanhoutte* 2862
α-Adrenergic tone in the coronary circulation of the conscious dog. *S. F. Vatner* 2867
Evidence against significant resting α-adrenergic coronary vasoconstrictor tone. *D. M. Griggs, Jr., W. M. Chilian, R. B. Boatwright, T. Shoji, and D. O. Williams* 2873
Effects of acetylcholine on the coronary artery. *P. M. Vanhoutte and R. A. Cohen* 2878
Parasympathetic control of coronary blood flow. *E. O. Feigl* ... 2881

MINISYMPOSIUM SUMMARY

Membrane dynamics: flow routes and quantitation of membrane transport and recycling. *D. J. Morré, C. J. Widnell, and L. Thilo* 2884

SYMPOSIUM

Neuropeptidergic Regulation of Food Intake

Chaired by *A. S. Levine and G. K. W. Yim*

Introduction. *A. S. Levine and G. K. W. Yim* 2888
Gut peptides and postprandial satiety. *G. P. Smith and J. Gibbs* 2889
Opioids, feeding, and anorexias. *G. K. W. Yim and M. T. Lowy* 2893
Peptidergic control of food intake in food-producing animals. *C. A. Baile and M. A. Della-Fera* 2898
Neuropeptides and appetite: contribution of neuropharmacological modeling. *J. E. Morley, A. S. Levine, B. A. Gosnell, and C. J. Billington* 2903

MINISYMPOSIUM

Peripheral α-Adrenergic Receptors

Chaired by *R. R. Ruffolo, Jr. and W. Matthews*

Introduction. *R. R. Ruffolo, Jr.* 2908
Interactions of agonists with peripheral α-adrenergic receptors. *R. R. Ruffolo, Jr.* 2910
Renal α adrenoceptors. *R. J. Summers* 2917
Postsynaptic α adrenoceptors on vascular smooth muscle. *W. D. Matthews, K. F. Jim, J. P. Hieble, and R. M. DeMarinis* 2923

SYMPOSIUM SUMMARY

Neuromodulation of intestinal ion transport. *T. S. Gaginella* ... 2929

Number 15. DECEMBER 1984

ACKNOWLEDGMENTS ... 2935

NEWS ... 2936

SYMPOSIUM

Area Postrema

Chaired by *K. R. Brizzee and H. L. Borison*

History and status of the area postrema. *H. L. Borison* 2937
Neuronal connections of the area postrema. *R. A. Leslie and D. G. Gwyn* 2941
The structure of the mammalian area postrema. *K. R. Brizzee and P. M. Klara* 2944
Ultrastructural localization of monoamines and peptides in rat area postrema. *V. M. Pickel and D. M. Armstrong* 2949
Behavioral and electrophysiological studies of peptide-induced emesis in dogs. *D. O. Carpenter, D. B. Briggs, and N. Strominger* 2952
Role of the area postrema in vomiting and related functions. *H. L. Borison, R. Borison, and L. E. McCarthy* 2955
Participation of the area postrema in cardiovascular control in the dog. *K. L. Barnes, C. M. Ferrario, C. L. Chernicky, and K. B. Brosnihan* 2959

Localization of neurally mediated arrhythmogenic and coronary vasoconstrictor properties of digitalis. *J. C. Somberg* 2963
Area postrema: part of the autonomic circuitry of caloric homeostasis. *R. J. Contreras, T. Kosten, and E. Bird* 2966
Area postrema and adjacent solitary nucleus in water and energy balance. *R. R. Miselis, T. M. Hyde, and R. E. Shapiro* 2969

MINISYMPOSIUM

Aminoacyl-tRNA Synthetases: Structure-Function, Regulation, and tRNA Recognition

Chaired by *L. H. Schulman*

Misaminoacylation by glutaminyl-tRNA synthetase: relaxed specificity in wild-type and mutant enzymes. *P. Hoben, H. Uemura, F. Yamao, A. Cheung, R. Swanson, M. Sumner-Smith, and D. Söll* 2972
Recognition of tRNAs by aminoacyl-tRNA synthetases: *Escherichia coli* $tRNA^{Met}$ and *E. coli* methionyl-tRNA synthetase. *L. H. Schulman and H. Pelka* 2977
Crystallization of substrate and product analog complexes of tryptophanyl-tRNA synthetase. *C. W. Carter, Jr. and D. E. Coleman* 2981
^{13}C NMR studies of dynamics and synthetase interaction of [4-^{13}C]uracil-labeled *Escherichia coli* tRNAs. *M. P. Schweizer, J. I. Olsen, N. De, A. Messner, I. Walkiw, and D. M. Grant* 2984
Size polymorphism and the structure of aminoacyl-tRNA synthetases. *P. Schimmel, M. Jasin, and L. Regan* 2987
Cell culture mutants as aminoacyl-tRNA synthetase complex probes. *A. Hampel, A. Mansukhani, and T. Condon* 2991

SYMPOSIUM

Calmodulin

Chaired by *W. Y. Cheung*

Introduction. *W. Y. Cheung* 2994
Calmodulin: its potential role in cell proliferation and heavy metal toxicity. *W. Y. Cheung* 2995
Sequential events in calmodulin on binding with calcium and interaction with target enzymes. *J. A. Cox* 3000
Calmodulin-sensitive calcium-pumping ATPase of plasma membranes: isolation, reconstitution, and regulation. *E. Carafoli* 3005
Role of calmodulin in neurotransmitter synthesis. *H. Fujisawa, T. Yamauchi, H. Nakata, and S. Okuno* 3011
Role of myosin light chain kinase in muscle contraction. *S. V. Perry, H. A. Cole, O. Hudlicka, V. B. Patchell, and S. A. Westwood* ... 3015

MINISYMPOSIUM

Chemistry and Molecular Biology of Ia/DR

Chaired by *S. E. Cullen*

Structure, regulatory polymorphisms, and allelic hypervariability regions in murine I-A_α. *H. O. McDevitt, D. J. Mathis, C. Benoist, M. R. Kanter, and V. E. Williams II* 3021
Analysis by molecular cloning of the human class II genes. *H. Erlich, D. Stetler, R. Sheng-Dong, and R. Saiki* 3025

LECTURE

New aspects of glutathione biochemistry and transport: selective alteration of glutathione metabolism. *A. Meister* 3031
